

# OpenTouch Enterprise Cloud

## Full Featured Enterprise Telephony

OpenTouch Enterprise Cloud delivers the advanced features users expect from a business telephone system through the cloud. Incoming ringing, calling features such as conference, forward and transfer, as well as optional voice mail, unified communications and ACD features are all available. These services are combined with new conversation features optimized for mobile workers and B.Y.O.D. deployments.

- Visual and voice communications from iPad, PC, smartphone and video phones.

- Escalate from IM to voice to video on a single conversation with Rapid Session Shift.

- Drag and drop a “favorite” into the conversation window to start a call or add someone to a conference.

## Any Device, Any Time

OpenTouch Enterprise Cloud simplifies communications and conversation by allowing you to use whatever device is most convenient. OpenTouch Enterprise works across all of your devices: smartphone, tablet, PC and land line. You can even freely move your calls between

devices during an active conversation.

## Flexible Deployment Options

Whether you want all of your communications or just some of your communications to reside in the cloud, OpenTouch Enterprise Cloud will maximize productivity gains and ROI while eliminating inefficiencies.

- Overlay OpenTouch Cloud over existing equipment such as the current enterprise PBX.
- Take advantage of new features and services while reusing existing investment and existing equipment.
- Deploy digital or analog telephone sets that connect to OpenTouch Cloud through a secure gateway when VoIP is not practical.

*Tap and slide to move calls between devices.*

## Hosted UC Optimized for Medium and Large Businesses

OpenTouch Enterprise Cloud offers advanced voice, video and unified communications accessible anywhere, anytime from any device. Enable real-time collaborative

conversations between your business and your customers with OpenTouch Enterprise Cloud. Several service plan options are available to meet your unique business requirements.

## Unique Multimedia Conversation

From any of your devices choose the best way to collaborate with your peers.
